

KING ABDULAZIZ UNIVERSITY

Faculty of Engineering
Alumni Relations Unit

Alumni Survey Cumulative Report, 2007-2015

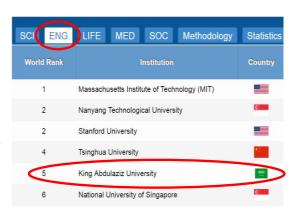

September 2016

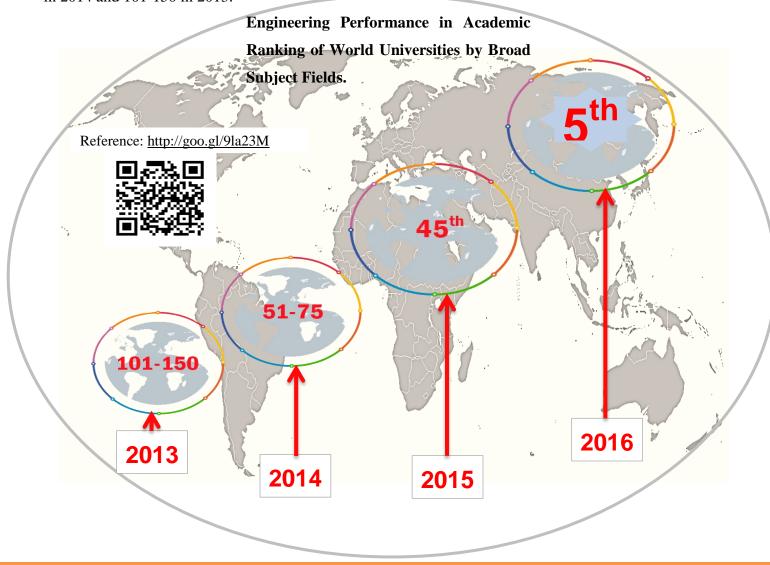

International Rankings

1. Academic Ranking of World Universities (ARWU)

Faculty of Engineering prides itself on being recognized internationally for excellence in education and research. According to the prestigious 2016 Academic Ranking of World Universities (ARWU), the 2016 ARWU-Field ranks Engineering *at 5th in the world*, up from 45th in 2015, 51-75 in 2014 and 101-150 in 2013.

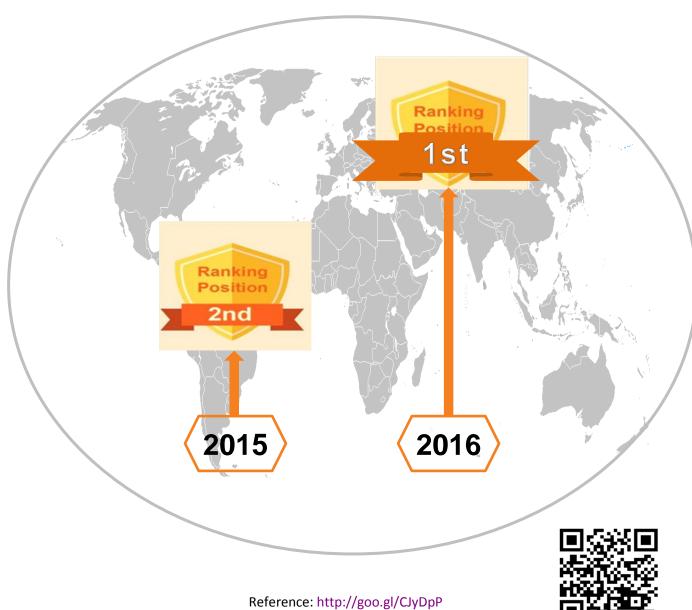

2. US News Ranking

U.S. News and World Report - Global Universities Rankings also ranks KAU as the 1st best Arab Region University for Engineering.

About the Report

Since March 2012 the ARU started surveying graduates in the previous years in parallel with those who just graduated. In the same time we build and maintain a database containing updated information about engineering students, alumni, employees, and the employers.

Monthly, ARU manages information on the employment status of FoE alumni, enabling accurate tracking such as career path, salary statistics, and comments for improvement.

As you examine the Alumni Survey Cumulative Report, please note:

- Data was collected for students graduating between 2007-2008 and 2014-2015 academic years.
- Percentages indicated are the percent of those responding to the survey.

EXECUTIVE SUMMARY

This cumulative report provides a comprehensive picture of employment of our graduates and illustrates the success FoE graduates have as it relates to their career. This success is illustrated by an overall reported employment rate of 84%. Furthermore, 79% of those who reported that they were employed indicated that they found their first job within the first six months of graduating or before graduation. And finally, 82% of those who indicated that they were employed reported that they felt their first job was directly related to their academic major.

The report details the responses from alumni who graduated from divisions within the Faculty of Engineering (FoE) in the last seven years, those of 2007-2008 through 2014-2015 academic years, totaling of 2523 respondents. The survey was conducted between March 10, 2012 and end of September, 2016 by the office of Alumni Relations Unit (ARU) through a telephone and e-mail survey.

The presentation of the results of the survey is divided into eleven broad categories: response rate, alumni distribution by current place of residence, employment status, sector specific employment distribution, Top employers of our graduates, time of getting a job, first job-major comparison, staring salaries, effect of GPA on time of getting a job and on the starting salaries, current job-major comparison, current salaries. A list of the employers of our alumni and alumni comments for improvement are included in the Appendix B and Appendix C, respectively. The data tabulations are included in Appendix A.

Participants

Accurate contact information (mobile and email) was obtained for 3,017 of the alumni graduating between Fall 2007 and Summer 2015. A total of 2,523 surveys were completed, resulting in a response rate of 84 percent.

Geographical Distribution of Respondents

A total of 2,308 provided us with their current place of residence. 94% of respondents are in the Kingdom while 6% are in: USA, Canada, Austraila, Eorube, Arab Countris and Far-East.

Employment Status

About three-fourths, 85% (2147/2523), of the respondents state that they were employed, 8% pursuing higher education, 4% were seeking employment, and about 3% working as self employed. About 80 percent of the employed respondents found their first job within the first six months of graduating or before graduation.

Top 10 Employers

The top 10 employers are hiring around 50 percent of engineering graduates each year. This is with the exception of laet three years, where hiring of FoE graduates were represented by employers other than the top 10 at approximately 62 percent in 2015.

First Full-Time Position

About eighty percent of the graduates were working within their field of study, and the remaining 20 percent say their first work was "not related".

Forty-four percent reported earning a starting salary between SR7,500 and SR10,000 a month. While 42 percent earned over SR10,000. 13 percent earned less than SR7,500. Only about one percent reported earning starting salary more than SR15,000.

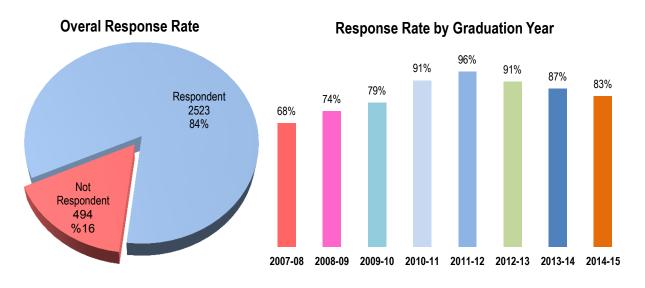

Current Position

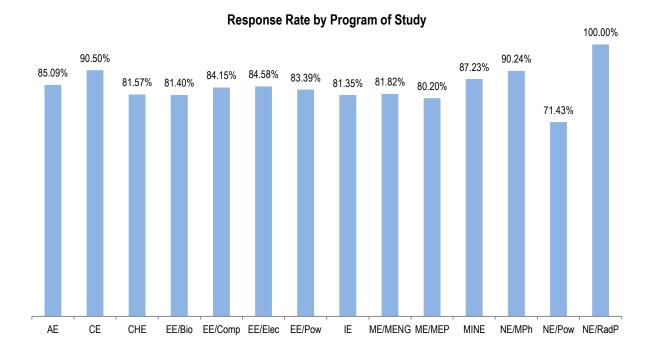

Approximately Forty- one of currently employed alumni are working in the government sector, and 40.2 percent indicate employment in the private sector, 7.8 percent in the academic and research, and about 4 percent for military. Relatively few alumni, (0.2%) for nonprofit sector and (3.8%) say they are self-employed. There were 3.7 percent of the alumni did not specify where they are working.

The average monthly current salaries is as follows: 34 percent reported earning between SR7,500 and SR10,000 a month, 52 percent earning between SR10,000 and SR15,000, 10 percent earning over SR15,000, and 4 percent reported earning salary less than SR7,500. 78 percent of currently employed alumni are working in jobs either "related" or "not related" (22%) to their academic major at the Faculty of Engineering.

Response Rate – Telephone and E-mail Survey

Students Who Graduated Between Fall 2007 -A.Y. 2014-2015 From a Telephone and E-mail Survey.

Highlights:

Regarding the response rate, Accurate contact information (mobile and email) was obtained for 3017, a total of 2523, responded. The response rate was 84%.

Time of Getting a Job

In response to the question "When did you start your first work?" a total of 2089 out of 2147 answered the question. More than three-fourths, 79% (1649/2089), of the respondents state that they started working within the first 6 months after

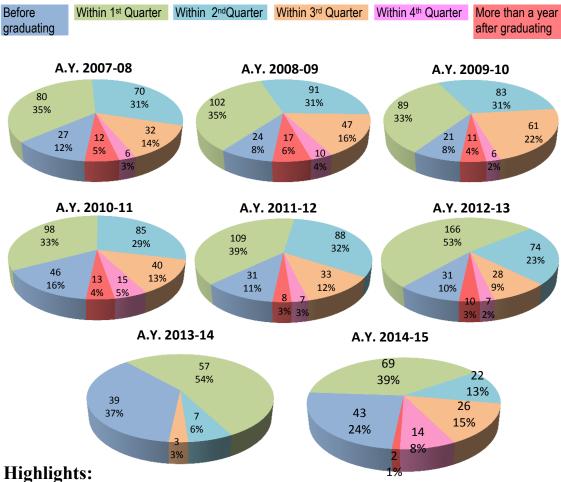

graduation or before graduation. The following table shows answers to the question by program of study.

Respondents by Program of Study (Numbers and Percentages)

By Academic Year

O

By Graduation Year

- ✓ For AY 2007-08, 78% (n=177) started working within first 6 months after graduation or before graduation.
- ✓ For AY 2008-09, 74% (n=217) started working within first 6 months after graduation or before graduation.
- ✓ For AY 2009-10, 72% (n=193) started working within first 6 months after graduation or before graduation.
- ✓ For AY 2010-11, 78% (n=229) started working within first 6 months after graduation or before graduation.
- ✓ For AY 2011-12, 82% (n=228) started working within first 6 months after graduation or before graduation.
- ✓ For AY 2012-13, 86% (n=271) started working within first 6 months after graduation or before graduation.
- ✓ For AY 2013-14, 97% (n=103) started working within first 6 months after graduation or before graduation.

✓ For AY 2014-15, 75% (n=134) started working within first 6 months after graduation or before graduation.

Highlights:

By Program of Study

- ✓ For Aeronautical Engineering, 62% (n=49) started working within first 6 months after graduation or before graduation.
- ✓ For Civil Engineering, 88% (n=284) started working within first 6 months after graduation or before graduation.
- ✓ For Chemical Engineering, 80.1% (n=181) started working within first 6 months after graduation or before graduation.
- ✓ For EE/Bio-Medical Engineering, 63.9% (n=39) started working within first 6 months after graduation or before graduation.
- ✓ For EE/Computers Engineering, 70% (n=81) started working within first 6 months after graduation or before graduation.
- ✓ For EE/Electronics & Communications Engineering, 73.4% (n=102) started working within first 6 months after graduation or before graduation.
- ✓ For EE/Power & Machine Engineering, 81.7% (n=156) started working within first 6 months after graduation or before graduation.
- ✓ For Industrial Engineering, 80.2% (n=279) started working within first 6 months after graduation or before graduation.
- ✓ For ME/Production Engineering & Mechanical Systems Design, 80.4% (n=295) started working within first 6 months after graduation or before graduation.
- ✓ For ME/Thermal Engineering & Desalination Technology, 86.3% (n=132) started working within first 6 months after graduation or before graduation.
- ✓ For Mining Engineering, 71.1% (n=27) started working within first 6 months after graduation or before graduation.
- ✓ For Nuclear Engineering, Average 53.1% (n=24) started working within first 6 months after graduation or before graduation.

First Job - Major Comparison

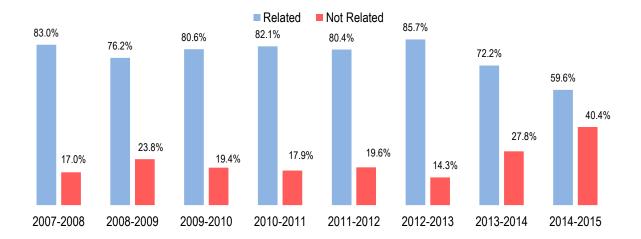

Survey respondents were asked: Was their first work related to their area of study? Regarding this question, a total of 2089 out of 2147 answered and 79% of respondents

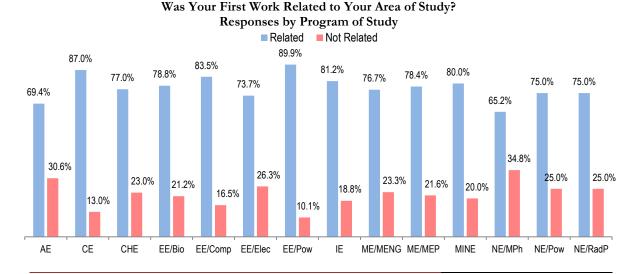

replied with related while 21% responded with not related. The distribution of responses by program of study is as follows, responses with related are as follows: Aeronautical 51(69.4%), Civil 277 (87%), Chemical 177 (77%), Electrical-Biomedical 42

Related 1645 79% 87%), eal 42 8.5%), Electrical-

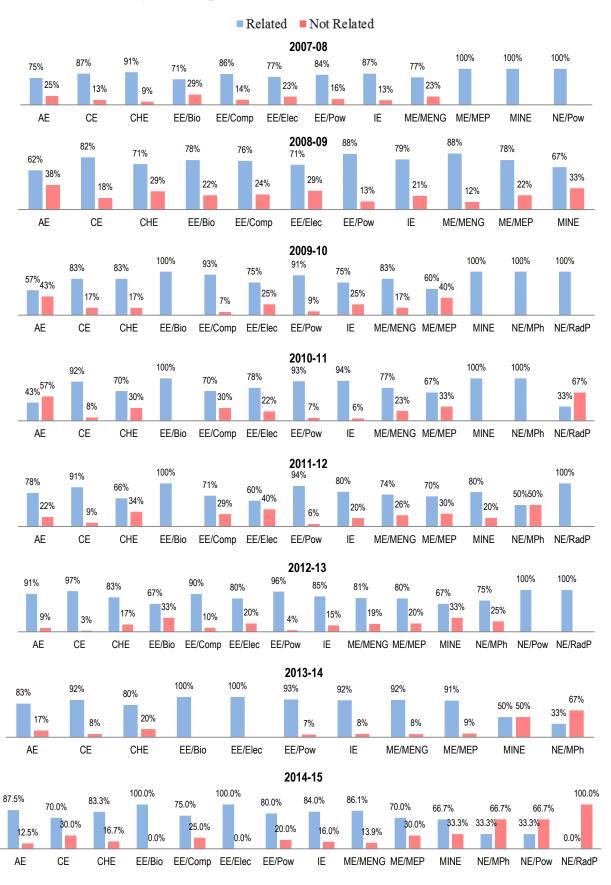

444

(78.8%), Electrical Computers 103 (83.5%), Electrical-Electronics and Communications 106 (73.7%), Electrical-Power Engineering 178 (90%), Industrial 289 (81.2%), Mechanical/Production 288 (77%), Mechanical/Thermal 70 (78.4%), Mining 27 (80%), Nuclear/Medical Physics 15 (66.2%), Nuclear/Power 6 (75%), and Nuclear/Radiation Protection 9 (75%).

First Job - Major Comparison for each Graduation Year

Graduates Starting Salaries

In response to the question about starting salary, a total

of 1989 of FoE graduates answerd this question as follows: 862 (44%) of the respondents state that it was between 7,500 and 10,000 SR, 840 (42%) said it was between 10,000 and 15,000,

263 (13%) said that the first salary was less than

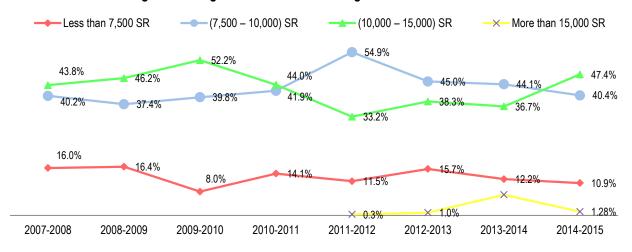

7.500 and 22 (1%) earned more than 15,000 SR monthly as a starting

7,500, and 22 (1%) earned more than 15,000 SR monthly as a starting salary.

(10,000 – 15,000) SR, 862, 44% Less than 7,500 SR, 263, 13% More than 15,000 SR, 263, 13%

The overall average starting salaries is between 7,500 and 10,000 SR.

How starting salaris for graduates have been changed between AY 2007-08 and 2014-15

Graduates Starting Salaries by Program of Study

Effect of GPA on Time of Getting a Job and on the Starting Salary

The following charts show the effect of alumni grades on time of getting a job and starting salary.

	Grade						
	Α	В	C	D	Total		
Time of getting Job	145	583	827	183	1738		
Starting Salary	88	352	454	113	1007		

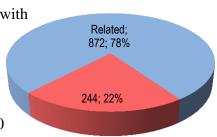

The details are tabulated in Appendix A.

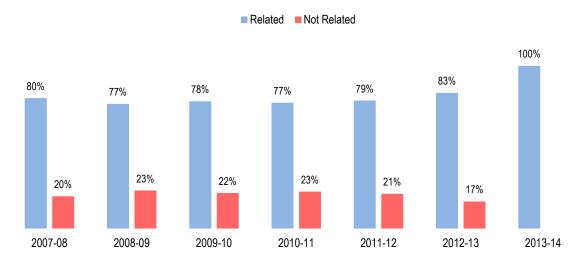

Current Job - Major Comparison (if applicable)

In cases of graduates who stay longer than one year with the same employer, or moved to different position, and those transferred to new employer, they answered the question: "Is your current work related to your area of study?". A total of 1116 out of 1860

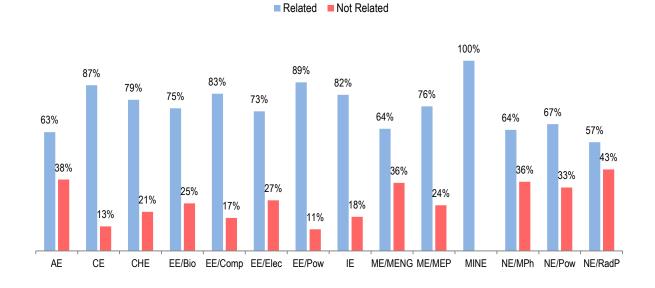

answered, 78% replied with related while 22% responded with not related.
