## Remarks:

1. Any student who misses $25 \%$ of the class will receive DN.
2. We emphasize that each student should buy the textbook, if he or she does not have it, from the first day of classes because we will use its examples and problems to teach this course, and each student need to have a book-access-code in order to log-in to the homework system online.
3. Students should exercise all problems in HW column.
4. Homework should be submitted online on or before the due date.
5. If one of the students is absent from one of the exams due to an acceptable excuse by the instructor, then the mark will be calculated as a percentage from the total of the other exams.
6. The requirements to get an IC grade due to being absent from the final exam are: an attendance of at least $80 \%$ of the total lectures, attendance of the first and second exams and an acceptable excuse by the Educational Affairs.
