CLINICAL EXPERIENCE

PAEDIATRIC NEPHROLOGY: From December 1994, I worked as a registrar in paediatric nephrology at the RFH in London and from July 1995 as senior registrar (SR) in paediatric nephrology in the same institution. From September 1996, I have worked as paediatric nephrology SR at Great Ormond Street hospital. I learned how to manage renal transplantation, peritoneal and haemodialysis. I did the nephrotic clinic for one year and hypertension clinic for another year. In addition to the ward follow up clinic (general nephrology) which, I have covered for 1 year. I had a contract as honorary paediatric nephrology SR at GOS after I left the department until September 2000, which enabled me to continue my research in paediatric nephrology. Since September 2000, I had been working as a consultant paediatric nephrologist at KAUH in Jeddah, which covers a large population. We have established a paediatrics renal unit with peritoneal and haemodialysis facilities. . I have kept my link with the UK to keep myself updated by doing locums in good centers such as GOS

GENERAL PAEDIATRICS: I have been working as a paediatrician for the last 20 years. I have built a lot of experience in acute paediatrics in developing country. After moving to the UK, I consolidated my general paediatrics experience at Newham, Oldchurch Hospital, the Royal Free Hospital and the Royal London Hospital. I found working in multi-racial community of East London and Romford very interesting indeed. My current job involves covering general paediatrics on-calls.

TEACHING: As a member of an academic department, I have been involved in undergraduate teaching throughout my career. During my training at the Royal Free Hospital and Old Church hospital, I was involved in teaching medical students. Since early 1991 I have also been actively involved in postgraduate teaching. Currently, I am teaching undergraduate as well as postgraduate students and I am a regular Saudi board examiner as well as the clinical examination of MRCPCH (membership of the Royal College of Pediatrics and Childhealth) .

RESEARCH EXPERIENCE:

Research remains my main area of interest particularly clinical research but I have valuable experience in laboratory research which involves collaborative work

ADMINISTRATION:

- Chairperson of Pediatrics department at KAUH (July 2009-June 2011)
- Head of Pediatric Research unit (KAU) (2012-Now)
- Member of Pediatric Nephrology Scientific committee of Saudi Council of Health Sciences (2011-now)
- Member of Pediatric Nephrology exam committee of Saudi Council of health sciences (2013-now)
- Member of the King Abdulaziz University research deanship(March 2010-2012)
- Member of higher committee of King Fahad Medical Research Center (August 2007 –2008)
- Deputy Chairman of Pediatric Department (September 2007-July 2009)
- Member of the higher committee of hospital administration (2005-2007)
- Saudi Board Program director: August 2004-November 2005 I was a member for 1 year (2003-2004).
- Member of CME committee for 2 years (2002-2004)
- Coordinator for 6th year committee for 2 years (2002 - 2004) which involves arranging their location and organizes their exams and approves their results.

AUDIT EXPERIENCE: During my work at different hospitals, I had been involved in many audit projects:

- Royal Free Hospital: the use of paediatric day care unit over three months from June to July 1994.
- GOS: a detailed audit about children transplanted at the age of 5 years or under at Great Ormond street over 10 years.
- GOS: outcome and growth of infants with severe chronic renal failure presented to Great Ormond Hospital between 1/1/86 and 1/12/98 (101 children)
- Royal London Hospital: Pregnancy outcome of lupus and connective tissue diseases over 30 months.
- KAUH: Many audit projects which was published or in press
