Aim:

The aim of the course is to provide the participants with the skills & knowledge to perform peripheral intravenous cannulation safely and competently in the workplace.

Course Description:

Cannulation is an invasive procedure that is commonly performed in Hospital and can be carried out by a range of suitably trained health-care professionals. The program is designed to acquire knowledge and skills in performing venipuncture and peripheral intravenous cannulation. This half-day (4hour) course will equip the attendee with the skills and knowledge required to gain competence in venipuncture and peripheral IV cannulation. The course is predominantly practical and candidates have the opportunity to practice using the most up-to-date training manikins.

Target Participants:

- Staff and practical nurses
- Anesthesia nurses and technicians
- Lab and blood bank technicians
