Abstract: In the title compound, C\textsubscript{10}H\textsubscript{6}BrN\textsubscript{3}O\textsubscript{2}, the indazole fused-ring system is nearly planar (r.m.s. deviation = 0.008 Å); its nitro substituent is nearly coplanar with the fused ring [dihedral angle = 4.5 (2)^°]. In the crystal, adjacent molecules are linked by weak acetylene-nitro C-H⋯O hydrogen bonds, generating a helical chain running along the \textit{b} axis.
