

Research project title

عنوان البحث

(Degree: Masters/PhD)

Student Name:		UID:	
Supervisor:		UID:	
Co-supervisor:		UID:	

Background:

Please write an abstract no more than 300 words.

Keywords: Please add keywords that fit the research project

Project objectives:

A student undertaking this project should achieve the following objectives:

Please list the project objectives with some details

- 1.
- 2.
- 3.
- 4.

Project Methods:

Supervisor:

Co-supervisor:

Student:

PG-rep:

**Key discussion topics between the supervision team and the student before approval
(please ✓ the boxes when discussed):**

- The project details.
- Expectation from the student working on the project.
- Skills and training required (if any)
- Commitment to lab work and meeting deadlines (full-time).
- Funding.
- The research project timeline.
- Graduation requirements according to the KAU PG regulations.
- Set a schedule for regular meetings with the supervisor(s) throughout the research period.
- Any concerns or health issues that could pose any risk on the student or delay the project progress should be declared before the commitment to this project.**

The student's tasks:

Any student working on this project should follow the plan below:

Planning and setup:

1. Write a comprehensive and up-to-date literature review.
2. Build a good theoretical background on any equipment or methods used in this project.
3. Get some hands-on and training on any equipment used in this project (if available).
4. Working on the experimental design and finding all the requirements for the experiments (e.g. chemicals, quotations, kits).
5. Add more...

Experimentation and data collection:

6. All experiments details should be documented in the lab book.
7. Any experiments or major changes should be consulted and reviewed with the supervisor(s) in advance.
8. Any results should be reviewed with the supervisor(s).
9. Discuss the publication plan (if applicable)
10. Add more...

Write-up and project completion:

11. Provide a list of content of the dissertation.
12. Set a time and date for regular meetings with the supervisors.
13. Submission of publication (if applicable).
14. Present a scientific poster/talk in a scientific conference (if applicable).
15. Hand in the first draft of the dissertation on the agreed date.
16. Hand in the final draft if the dissertation on the agreed date.
17. Discuss the defense date.

Declaration:

1. Both the supervisor(s) and the student should abide by the KAU PG regulations in its latest iteration. Any disputes that might occur during the research project period will be resolved based on the KAU PG regulations.
2. Any publications from this project should reference the department of Biochemistry as the first affiliation in the following format “*Department of Biochemistry, Faculty of Science, King Abdulaziz University*” or “*Biochemistry Department, Faculty of Science, King Abdulaziz University*”.
3. Any publication(s) from this work that do not affiliate any of the supervisor(s) or student (unless agreed on otherwise) will not be accepted as a graduation requirement, and could lead legal prosecution if published after graduation.
4. Any key findings or results should not be disclosed or presented without the consent of the supervisors.
5. Any major changes in the project will require a new signed form indicating these changes and the timeline.
